## Hundreds of New Products and Services at the Home Show

**Phoenix, Arizona - July 21, 2009** - The Maricopa County Home & Garden Show is the best place to see hundreds of new products and services that have been recently introduced to the Phoenix home improvement market.

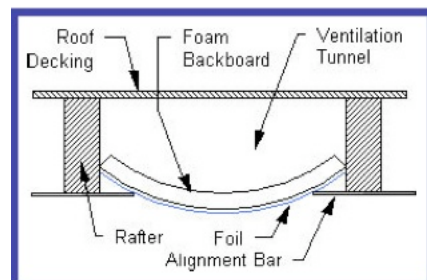

Over the years there have been hundreds of new products and services introduced into the Phoenix home improvement market at the Maricopa County Home Shows and this August is no exception. With the current economy, many companies see that new product innovations are required more now than they have ever been before, and that means great things for the homeowner. In fact, now may be the best time to be a homeowner, with all the innovative, cost effective and durable new products & services that are being introduced to the market. Homeowners are being presented with so many more options to help save money, conserve energy, or provide added security and value to their homes.

As you are walking through the show, be sure to stop at the booths that are displaying the "New Product" signs to learn about their innovative new product or service.

Here are just a few of the many new products you will see at the Show:

### Reduce Your Energy Bills

A new innovation called Reflectafoam (RF), an attic ventilating Radiant Barrier, has just been introduced to the Valley of the Sun. With it's patent pending bow and flex installation method RF creates a ventilation channel from the eaves of the home to the peak of the attic. RF's Radiant Barrier skin allows less than 3% of the intense summer heat into your attic. These two benefits combined have yielded homeowners an annual savings of over \$600. **Guardian Energy Solutions booth #2202**

### Highest Level of Security for Your Home

The Sunnect AP501 Advanced Protection Digital Deadbolt Lock is stylish enough to complement any decor, and it's built to last. This advanced security system offers keyless entry with a backlit keypad, "decoy digits" to deter hackers, an intruder alarm, and more, all in a durable and rigorously tested deadbolt. **Sunnect, booth #719**

## The Toughest Spa on the Market Just Got Tougher!

While spas of the past have traditionally been made out of acrylic and fiberglass, the new line of Tuff Top Spas are made out of an extremely durable plastic called Polyethylene. The Tuff Top Spas are rotationally molded, which means there are no layers to blister, crack, chip or peel like acrylic spas. Never buy another cover again! It holds over 300 lbs. of weight, requires no maintenance, the top can be taken on and off by one person, is energy efficient, and comes with a safety lockdown system and a lifetime warranty. **Tuff Pools & Spas, booth #816**

## The World's First Energy Drink for Plants

Great Big Plants is a liquid organic compost that energizes garden soil and jump starts plants. This new product includes a combination of organic compost, humic acid, beneficial microorganisms and micronutrients vital for superior plant growth that are missing from fertilizers. Derived from all natural sources and organic, Great Big Plants gives an energy boost to all vegetables, fruits, shrubs, trees, lawns and potted plants. **Gardeners Eden Landscape/ Gardeners World Nursery booth #L3**

## Clean, Sanitize and Deodorize with Just Water

Because of the hard water here in Arizona, most manufactures require that their cleaners be used with distilled water but now there is a cleaner on the market that works best with just tap water. The Ladybug 2350, featuring the innovative TANCS (Thermo Accelerated Nano Crystal Sanitation) technology actually harnesses the energy from minerals found in tap water for a superior clean.

**Vapor Professionals booth #512**
